MINING, BUSINESS AND STOCKS

BINGHAM MERGER IS NOT CONFIRMED

Locally Little Credence is Given To Story Printed by Eastern Financial Papers.

DENIALS HAVE BEEN MADE.

News to Mr. Saxman of the Yampa-Talk With Extensive Phoenix Shareholders.

There has been a good deal of talk in Boston lately about a scheme to consolidate several well known Bingham mines, and in this connection is mentioned the Utah Consolidated, Yampa, Utah Apex and Phoenix. Some financial papers back east have devoted considerable space to the story, which up to the present time, seems to lack anything like official confirmation.

Locally, the narrative is given little credence and persons in position to know absolutely deny that any such deal is being worked out or is in con-templation. However, almost any-thing is possible these days; but it can be said with every degree of cer-tainty that there is no indication of the passing of the control of the last three named properties to the Utah Consolidated, or any other corporation, right away.

three named properties to the Utah Consolidated, or any other corporation, right away.

General Mahager Risque of the Utah Consolidated is in New York and for that reason no one is here representing that corporation who is in position to talk advisedly on the subject. General Manager Charles W. Saxman of the Yampa mine declared today that any contemplated change in the affairs of the Yampa or associated companies is news to him, and the fact that he yesterday let a contract for an addition to the simelter would indicate that there is not likely to be any in the immediate future. Manager R. S. Oliver of the Utah Apex, who was in the city yesterday afternoon for a few hours, declared that development work is going ahead in about the usual way, and that he has not been advised of any contemplated change. A large shareholder of the Phoenix, when seen today, emphatically denied that the Phoenix property was on the bargain counter, and while he did not deny that the mine could be purchased, at the same time he declared, it would take a pretty stiff price to induce the present owners to part with their holdings.

ON MINING EXCHANGE.

Black Jack a Favorite During Today's Forenoon Call.

Black Jack was the most popular stock on the exchange today and some big blocks were bought at 27 and up to 28 cents. It is claimed that some very encouraging developments have been made in the mine during the past few days. A small lot of Daly Judge came out and Columbus Consolidated moved up to \$2.05. Ohio Copper continued firm and was bought at \$3.35 up to \$3.45, and Western Nevada at 42 and 45 cents. closing quotations and sales

NEVADA MINING SUIT.

One Affecting Manhattan Properties is Finally Ended.

Carson, Nev., Jan. 23.—In the supreme court yesterday a decision was handed down in the case of the Manhattan Union Mining company versus Dan McNamara et al. The court ordered a new trial. The supreme court holds that the Nevada mining laws and man the United States laws apply in not the United States laws apply the matter of mode of location and time of assessment work. The ground in dispute is situated on what is known as Litigation hill. Manhattan, where since the day of discovery there have been some cases pending in court over the ownership of he ground.

CONTRACT IS LET.

Yampa Converter Equipment to be

General Manager Charles W. Saxman yesterday afternoon let the contract for the new converter plant which the Yampa Smelting company proposes to install at its Bingham canyon smelter. The contract calls for two converter stands of sixteen shells, a blowing engine and steel building. The contract was given with the explicit understanding that the order is to be rushed and that the shipment is to leave the factory within ten days.

In the meantime the excavations are to be made and as soon as the material and equipment arrive they are to be installed without delay. Shipped Without Delay.

SWANSEA MINE MAY GO TO KNIGHT

Tintic Property is Desired as a Source of Water Supply for Smelter.

IS AN OLD DIVIDEND PAYER.

Manager Geddes Makes Admission That a Deal Has Been Pending.

Swansea came in for a share of attention on the floor of the Mining Exchange during the forenoon call and while no sales were recorded there was active bidding for the stock up to 55 cents a share. The fact that it went begging a few days ago around 20 cents a share made it appear that perhaps something of an unusual nature had occurred to cause such a sudden interest to be taken.

Around the Mining Exchange, it was talked about quite freely and the impression went out that "Uncle" Jesse Knight might be figuring to obtain a controlling interest in the mine and this was generally accepted as being the case. One party who is in position to know the facts, declared that "Uncle" Jesse had been negotiating with the directors of the Swansca for some weeks past; that he has long recognized the value of the property in connection with his Tintic smelter, which is located less than a half mile from the Swansea shaft, as a source of water supply. In fact, it is said, he almost depends on one or the other of with the state of the state of

sary element.

At the onices of the Swansea company in the Dooly block no one was disposed to talk very freely; however, Manager Theron Geddes while admitting there had been some negotiations pending between himself and Mr. Knight, he was not willing to say they I tad been brought to a conclusion, nor vould he give out any intimation as to what the consideration in the transation might be. From an unofficial source, however, it was learned that the price is not under \$1 as share.

The Swansea mine has been practically idle for several years. It was at one time a regular dividend payer, and is credited with having disbursed an tong its shareholders more than a har if million dollars. After the ore the posits above the water level were we rised out, it became impossible to operate the mine successfully without the aid of powerful pumps. At this point in its career an effort was made to get the Stouth Swansea Mining company to join in the expense; this the latter refused, to do; the old Swansea management not being disposed to drain its neighbor's property and bear all the burd in, both mines were compelled to close. The Swansea mine has been work in the content of the stower workings are still showing good values. Water was encountered at about 1,000 itect.

Both a the Swansea and South Swansea

Both the Swansea and South Swansea mines are productive of silver-lead-iron ores tery desirable at the smelters for fluxing with the silicious ores from fluxing with the silicious ores from some q the mines in other parts of the district. The Swansea company is capitalized for 100,000 shares.

CAMP OF RAWHIDE.

Tonops h Mining Men Greatly Interested in New Camp.

Rawhi he is the latest camp to get into the limel ight, and from all accounts the camp is going to occupy the center of the Nemada mining stage for some time to comp, says the Tonopah Miner. To-nopah is greatly interested in the new district, and everybody who can get away it going there. A number of local people have acquired good properties there and are preparing to work them systematically. No one from Tonopah who has visited the new camp has returned with a "knock."

who has visited the new camp has returned with a "knock."

The Tiger and Royal claims, recently taken over by Tonopah investors, are dividing hymors with the Kearns lease, and the last "big thing" is the lease of the Grutt brothers on Mascot hill. The Grutt brothers, four in number, have been the greatest factors in bringing the camp to public notice by the work they have done, and they are regarded as the life and soul of the camp. It was they who so id the Kearns lease to the present own ers—sold it because they needed money to work their other needed money to work their other ground. They were aware of the value of the Kearrs lease, for they are all practical myters, and they got a fairly good price for it—\$35,000. Kearns has already taken i nore than that out of the ground, and the lease is now shipping 20 tons a day to the Nevada Goldfield Reduction Worls; at Goldfield.

tons a day to the Nevada Goldfield Reduction Works; at Goldfield.

Grutt broths is have just made a rich strike in their ground on Mascot hill, showing 14 inct less of ore on the hanging wall that goess; \$365 to the ton, while next to this there is 18 inches of ore that runs about \$50 to the ton.

During the week a party of Tonopah men composed of Zeb Kendall, Roger Dougherty, Genorge W. Thatcher and Bob Govan visits of the new camp. Kendall and Dough sity operated leases on Mount Oddie in the early days of Tonopah, and they both say that the formation at Ra whide is almost identical with that of i he Mizpah. They state that the showing at Rawhide is better than that of tim Mizpah on the surface, and declare that they have never seen anything to teompare with the new district for rich as triace showings. The judgment of Zeb 'Kendall on a prospect is generally concerded to be good, and he is the last man to become enthusiastic over a mining proposition; but be came

is generally collected to be good, and he is the last man to become enthusiastic over a mining proposition; but he came back from his first visit to Rawhide with an inadequate vocabulary. "I am not making any con uparisons." said Zeb yesterday. "but the showing is the greatest that I zaive ever seen anywhere. I succeeded in getting something while there that I deem pretty good, and I am going back to work it as soon as possible."

Roger Dougherty (lescribes the showing as marvelous, at al says that it is a sight that recalls the haleyon days of Tonopah to see silving up along the hillsides at Rawhi die stack after stack of sacks of high; grade ore. He says that the appearance of the shatts could not be improved a pon and that notwithstanding the first that there is no money in the camp, there has been a great deal of good ng ning work done.

MEMBERS SALT LAKE EX-CHANGE.

some interesting developments are taking place in the north drift of the 650 level of the Ludwig division, which is nearing the rich ore shoot encountered on the level above. Considerable native copper is showing, which is taken as a sure indication of the near approach to ore as has been demonstrated on the levels nearer the surface. On the 550 level the entire face of the south 500 level is in ore carrying copper values of from 6 to 8 per cent; while on the north 550 the blocking out of sulphide ore is still in progress.

The Nevada Douglas company has two cars of 12 per cent copper in the murket today.

UTAH COPPER ELECTION.

(Pollock Special Wire.) Jersey City, Jan. 24 .- At the annual meeting of Utah Copper Co., stockholders voted to authorize issue of \$1,-500,000 convertible bonds. Bonds will bear interest at 6 per cent and be convertible at holders' option into stock at \$20 per share, proceeds are to be applied to increasing working capital. They also voted to increase capital stock from 6,600,000 to 7,500,000. Of this amount all but \$150,000 is to be used for providing for conversion of bonds. Charles Hayden and W. B. Thompson were added to directorate and retiring directors were re-elected. W. B. Thompson and Chas. Hayden are prominently identified with Cumberland Ely and Nevada Cons. companies. Their election to the Utah Copper mining board means closer relations between the three properties,

UTAH COPPER REPORT.

Manager Jackling Tells What Garfield Mill is Doing.

A telephone message received from Garfield during the day contained the information that Mill Manager Bettles of the Boston Consolidated Mining company expects to have the new mill at that place in operation tomorrow. The crushing department is in service today, but within 24 hours the stamps of the initial unit will be dropping.

BOSTON CON MILL.

Stamps Begin Dropping Tomorrow is Report from Garfield.

Dispatches from the east convey the information that the annual report of the Utah Copper company has been released and that during the year end-ing June 30 last, the total income of the company amounted to \$305,665. General Manager D. C. Jackling is quoted as saying, under date of Jan.

this year: "The operation of the Garfield plant up to the present time has fully proven the accuracy of the previous estimate, although operations cannot be at their maximum for some time to come. At this time the company is producing at the rate of 3,000,000 pounds of copper

the rate of 3,000,000 pounds of copper per month, at a cost of less than 8½ cents per pound for both plants. Of this output, approximately four-flifting is coming from the Garfield plant, at a cost under 8 cents per pound.

"In view of our performance under existing conditions, which cannot be brought to their highest degree of efficiency until the Garfield plant is in full operation, and the steam shovel pits are further opened up, thus permitting the most economical working, it can be stated with confidence that we should be producing copper within the next twelvemonth at a cost not to exceed 7¾ cents per pound."

CONCENTRATES.

The ore bullion settlements reported late yesterday by McCornick & Co. were: Crude ore and concentrate, \$4,base bullion, \$60,000. Brokers Ed. L. and Joe Sheets de-

parted today for the coast and will sail out on the Pacific to the Hawaiian and Society islands. They expect to be absent about six weeks. The United States Smelting, Refining

& Mining company has been reducing its office force in contemplation of the shutting down of its smelter at Bingham Junction.

PRICES UNCERTAIN

New York, Jan. 24 .- The stock market was easier in tone at the outset on a resumption of yesterday's late selling, but the losses were mostly limited to small fractions.

The dip in prices was followed by a good rally in which American Smelting was lifted a point, but the list again weakened materially in sympathy with the severe decline in the high priced coal road stocks. United States Express fell 9%. Central Railroad of New Jersey 814 and Reading, New York Central, Great Northern preferred, Union Pacific, Rock Island preferred, St. Louis and San Fran Island preferred, St. Louis and San Francisco second preferred and American Sugar 1. The market was quiet and a trifle above the low point at 11 o'clock. The duliness of the demand allowed prices to slip back, losses reaching a point in Atchison and Corn Products preferred 1% in Westinghouse Electric and 2 in Westinghouse Electric first. Utah Copper rose 1. Bonds were irregular.

lar.

Price movements were without significance. The cuimination of the foremon declines left the market without any effective lead and different stocks shited about aimlessly on a narrow range. The tone in general was firm and a decline in Northern Pacific and a rally of 3 in Delaware and Hudson having a beneficial effect on the general list.

PRODUCE. CHICAGO.

Chicago, Jan. 24.—The wheat market today opened weak because of a decline of one pence at Liverpool which was based upon larger shipments from Argentina than had bene expected. Liberal receipts in the northwest of this country also constituted a weakening factor. May wheat opened \$5 to \$5 lower at 1.01% to 60% and for a time held within that range.

the cold weather. May corn opened ½ to ½ lower at 60% to 60% sold up to 60% 661 and then reacted to 60%. The oats market was quiet and prices steady. May oats opened unchanged at 53% and Sold at 53% 50% firm because of a 5c advance in the price of live hogs. May pork opened 5c higher at 13.01%. Lard was a shade higher at 7.10; rbs were 5c higher at 5.97%. Close—Wheat—May 1.02%; July 98% 60%; Sept. 85%.

Sept. 95%. Corn-May 61%4 .4; July 60; Sept. 591/2

Onte-May (old) 52%; May (new) 52%; inly 47½; July (new) 45.

Pork—January 12.67½; May 13.17½.

Liq d—January 7.72½@7.75; May 7.97½@

Ribs-January 6.721/2; May 7.00; July 17/2.

Riss-dataly 1.17%.

Rye-Cash 83@85.
Barley-Cash 80@1.00.
Timothy-March 4.80.
Clover-March 17.75.
Wheat-The strength of corn caused some strength in wheat in the last hour of trading and May advanced to 1.023/@3/2.
The close was firm with May up 1/8 at 1.023/4.
Corn-A good demand from commission houses brought the price of May up to 611/40%. The close was strong with May 1/2/2 higher at 61%@3/2.

BUTTER AND EGGS. Chicago Jan, 24.—Butter steady; creameries 21@30c; dairies 19@27c. Eggs—Strong at mark, cases included, 21@22c.
